Make a home inventory

Your insurance company will want a list of the things you own if you file a claim. Making a list now will be easier than trying to do it later.

Along with filling out this inventory, use these tips:

- Take pictures of major appliances and their model numbers. You don't have to list them here.
- Keep receipts for expensive purchases.
- Ask your agent about getting more coverage for expensive items, like jewelry collections.
- Keep an electronic copy of your pictures and this inventory so you have access to it from anywhere.

Cost = how much you paid **Qty** = how many you have
