Introduction

This report includes information on the following lines of insurance:

- General liability.
- Commercial fire and allied lines.
- Residential fire and allied lines.
- Product liability.
- Commercial multiple peril.
- Private passenger auto.
- Commercial auto.
- Homeowners multiple peril.
- Workers' compensation.
- Boiler and machinery.
- Inland marine.
- Surety.
- Commercial crime.
- Commercial glass.
- Medical professional liability.
- Miscellaneous professional liability.

Why did we do this report?

Texas Insurance Code (TIC) 2251.008 requires the commissioner to annually report information about insurance company market shares, profits and losses, loss ratios, complaints, and the rates filed during the year to the governor, lieutenant governor, speaker of the House, the legislature, and the public.

This report shows market share based on the most recent year and the percent change from the year before.

Because of a change in law, TDI started collecting information about underwriting profits or losses and rate filings in 2007 (TIC 2251.008). This report contains the underwriting profit or loss information for all lines of business and the rate filing information for private passenger automobile and homeowners lines of business. Because of the cyclical nature of the underwriting profit or loss information, this report should not be used to determine the reasonableness of rates used by a given company.

Because of another change in law, in 2016 TDI began collecting data and issuing this report each calendar year instead of each calendar quarter (TIC 2251.008).

Terms

Number of policies written: The number of new and renewal policies issued in Texas during the year. The policies were adjusted to an annual basis. For example, a six-month policy was reported as 0.5 policies.

Premiums on policies written: This report captures the Texas portion of direct premiums written in the designated year without adjustments for cancellations or endorsements, so it may not match the written premiums figures in the statutory Annual Statement.

Direct premiums written: Written premium is the Texas portion of the statutory Annual Statement report of written premiums in the designated year.

Direct losses paid: Direct losses paid represents payments made during the year regardless of when the policy was written or when the accident occurred. Loss adjustment expenses (LAE) are not included.

Loss ratio: Unless otherwise specified, this ratio is developed by dividing direct losses paid during the year by direct premiums written during the year.

Earned to incurred loss ratio: This loss ratio is developed by dividing direct incurred losses by earned premiums. Both figures come from the statutory Annual Statement. LAE are not included.

Number of groups: Companies that are owned or controlled by one entity are considered a group. Unaffiliated companies are those that are not associated with any other insurance company. The number of groups referred to in this report is the number of groups plus the number of unaffiliated companies.

Market share: This figure represents an insurer's market share (expressed as a percentage) of the industry total for premiums written for the most recent calendar year.

Underwriting profit or loss: The underwriting profit or loss is calculated as the direct premiums earned less direct losses incurred, less loss adjustment expenses incurred, less other underwriting expenses incurred, and less dividends paid to policyholders. The underwriting profit or loss is exactly as the company reported and has not been reconciled to any financial reports.

Rate filing exhibits: The number of rate filings and rate filing summary information is reported by the company and has not been reconciled to actual rate filings that were received by TDI. Rate reductions are indicated by negative numbers in parentheses. Rate filing information is only reported if there was a change in a given period, so there may be occurrences where a 12, 24, or 36-month period is not displayed.

Lines of Insurance

Products and completed operations insurance or **product liability**: This insurance provides coverage for a manufacturer or contractor for claims after a manufactured product has been sold, or a claim results from an operation which the manufacturer has completed. Products liability also includes coverage for a contractor's or manufacturer's liability for injuries or property damage suffered as the result of the contractor or manufacturer completing an operation.

General liability: This insurance provides coverage for an insured when negligent acts or omissions result in bodily injury or property damage on the premises of a business or when someone is injured in the general operation of a business.

Commercial fire and allied lines: This insurance has two coverages - standard fire policy and extended coverage endorsements for businesses. A standard fire policy insures commercial properties against fire and lightning. The extended coverage endorsement covers numerous direct and indirect risks such as windstorm, hail, explosions, smoke damage, vandalism, and water damage.

Residential fire and allied lines: This insurance provides insurance coverage for personal, family, or household purposes.

Commercial multiple peril: This insurance generally provides coverage for businesses in four areas: property, liability, crime, and boiler and machinery.

Private passenger auto: This insurance provides coverage for liability, personal injury protection, uninsured motorist, and physical damage for personal vehicles.

Commercial auto: This insurance provides coverage for liability, personal injury protection, uninsured motorist, and physical damage for vehicles owned or used by a business.

Homeowners multiple peril: This insurance provides coverage against the insured's property being destroyed or damaged by various perils. It also provides coverage for the insured's liability exposure.

Workers' compensation: This insurance provides coverage with four types of benefits (medical care, death, disability, and rehabilitation) for employee job-related injuries or diseases without regard to fault.

Boiler and machinery: This insurance provides protection against the sudden and accidental breakdown or explosion of boilers, machinery, and electrical equipment. Coverage is provided for damage to the equipment, damage to the property of others, and expediting expenses. Coverage can be extended to cover losses resulting from the interruption of business.

Inland marine: This insurance provides coverage for property that may be in transit, held by a bailee at a fixed location, or movable goods that are often at different locations (for example, off-road construction equipment), or scheduled property (for example, homeowners personal property floater) including items such as live animals, property with antique or collector's value, and so on. These lines also include instrumentalities of transportation and communication, such as bridges, tunnels, piers, wharves, docks, pipelines, power and phone lines, and radio and television towers. This does not include motor vehicles licensed for use on public roads.

Lines of Insurance

Surety: This insurance coverage is a three-party agreement where the insurer agrees to pay a second party (the obligee) or make complete an obligation in response to the default, act, or omissions of a third party (the principal or obligor).

Commercial crime: This insurance provides coverage against loss of property caused by burglary, theft, or employee dishonesty. This may include losses inside or outside the premises, losses from counterfeit paper currency, and depositors forgery.

Commercial glass: This insurance provides coverage on commercial plate glass, lettering, frames, and ornamentation.

Medical professional liability: This insurance provides coverage against losses due to claims for damages alleging malpractice by physicians, surgeons, hospitals, or other health care providers in their professions.

Miscellaneous professional liability: This insurance provides coverage for professional practitioners that will defend suits filed against them for malpractice or errors and omissions. It will also pay any damages, subject to policy limits. To comply with applicable statutes, the following have been excluded from miscellaneous professional liability: architects, beauticians/barbers, lawyers, medical laboratory personnel, psychologists, real estate agents, surveyors, and X-ray lab personnel.

Summary of Year

Totals for Year Ending December 2023

	Number of Groups/Companies	Number of Policies Written	Premiums on Policies Written	Direct Premiums Written	Direct Losses Paid

Workers' Compensation (Residual Market)

Workers' compensation assigned risk policies can't be written as of January 1, 1994. As business runs off, all experience reported here will be that of the Start Program (residual market) reported by Texas Mutual Insurance Company (formerly the Texas Workers' Compensation Fund).

For the year ending in December 2023, the Start Program reported \$7,493,685 in direct premiums written. This accounted for 100% of all residual market experience reported, and was a decrease of 9.5% from the year before.

The balance of all workers' compensation (Page 35) minus the voluntary market (Page 37) minus residual market experience reported above is due to runoff business, including retro adjustments and policy audits, reported on policies written before January 1, 1994.

The table below includes data for all groups, including Texas Mutual Insurance Company. The table on the following page contains data only for Texas Mutual Insurance Company. This table illustrates the experience of the Start Program.

Workers' Compensation (Deductible Plans)

There were 90 groups (296 companies) that wrote voluntary policies for workers' compensation in 2023, as compared to 90 groups (294 companies) in 2022.

The data in the following table represents direct policies written as new or renewal policies in 2023. The policies are adjusted to an annual basis (a six-month policy is reported as 0.5). The premiums on direct policies written are total premiums (estimated if initial premium collected was a deposit or fourth installment premium).

The total premiums on direct policies written after deductible credit as shown in the table below and on Page 42 will not equal the total direct premiums written on Page 35. As referenced on Page 2 of this report, premiums on policies written captures the direct premiums written in the year without adjustments for cancellations or endorsements, so it may not match the written premium figures in the statutory Annual Statement. In contrast, direct premiums written are reported using the same methods and rules used in completing the statutory Annual Statement.

The premiums on direct policies written are presented before any credits are given for the purchase of deductible plans, and in the following column after the credit has been given for the applicable deductible plan. This is presented to highlight the effect deductible plans have on insureds' premiums. The final section of the table contains data which illustrates the volume of workers' compensation insurance written on policies which do not include a deductible plan.

	Policies Written 2023	Premium on Direct Policies Written Before Deductible Credit	Premium on Direct Policies Written After Deductible Credit	Percent of Reduction in Premiums
