Work Experience

Aviation Systems Engineering Company (ASEC), Test Asset Configuration Manager

February 2012 - Current

- ✓ Direct oversight of multiple aircraft prototype installs on Chief of Naval program aircraft averaging 78 hardware and 20 software/firmware installations annually including all required testing procedures reducing aircraft down time by 70%
- ✓ Manage project and milestone completions coordinating aircraft work efforts between contingent of 100 military personnel and up to ten civilian agencies reducing low rate initial production of product to under one-month.
- ✓ Inspection authority for all alterations and installations under military specification and AC 413.13B resulting in zero defect missions.
- ✓ Responsible for over \$220 million worth of assets as a configuration manager.

American Eagle Airlines, Maintenance Operations Controller

October 2011 to January 2012

- ✓ Responsible for safe and effective control on over 1500 flights daily within the continental United States.
- ✓ Coordinated aircraft on ground (AOG) and scheduled maintenance efforts with fifteen outlying facilities
- ✓ Managed and scheduled maintenance trips for aircraft in Canada and Mexico with a \$100,000 budget.

United States Navy Chief Petty Officer (E7) Flight Engineer

February 1991 to February 2012

- ✓ Directed 100-member department encompassing \$100 million in supplies and aircraft operations.
- ✓ Managed 50-person maintenance team overseeing 5,000 discrepancies and 10,000 flight hours.
- ✓ Reduced avionics discrepancies by 47% through proper troubleshooting and maintenance awareness.
- ✓ Managed 2200 government charge cards worth \$154 million and reduced delinquency below 2%.
- ✓ Managed 150 aircraft quality assurance maintenance programs within six military commands.
- ✓ Trained and mentored 150 initial mid-level managers over three years.
- ✓ Earned top-divisional award for career excellence.
- ✓ Oversaw training and evaluation for 500 instructor flight engineers and 25 military commands.
