Health and Life Annual Statement for the 2025 calendar year

Executive Summary

This report provides Texas premiums, losses, and certain expenses for each company licensed to write health insurance, life insurance, or annuities in the state. The report provides this premium, loss, and expense data for the calendar year ending December 31, 2025, on a direct basis before any reinsurance. TDI takes this information from the annual financial statements obtained from the National Association of Insurance Commissioners' (NAIC) financial statement database.

The report shows the data by company and by insurance type. Different types of health insurance include comprehensive health, dental only, disability income, Medicare supplement, and vision only. Different types of group and individual life insurance include credit, term, universal, variable, and whole. Different types of group and individual annuities include fixed, indexed, life contingent payout, variable with guarantees, and variable without guarantees

This data can be used to develop information about the life and health insurance market, including market shares, loss ratios, and other statistics. However, the data in this report is not appropriate for measuring the adequacy or inadequacy of the rates for a company or type of insurance.

Why did we do this report?

TDI compiles and publishes this information annually as a reference for TDI staff, other state agencies, policymakers, and the public.
